

Church Eaton Special - March 2006

FOCUS

From Councillor Barry Stamp

Good News On Pavement Work

I am pleased to report that the County Council intend to re-lay the footpath outside your home. When I was County Councillor for Church Eaton, I arranged a number of site visits with engineers from the Highways Department to look at the poor state of the footpaths in the village. Following these visits they agreed to re-lay the paths. Unfortunately they reneged on their promise that the work would be carried out last year, but following pressure from myself and the Parish Council the work is now to go ahead.

Barry inspecting the pavements which are to be re-laid in Church Eaton

Before work starts the Council are waiting to hear from ABB, who are responsible for maintaining the street lights, as some lights in the Village might be replaced. With this in mind the Council do not want to re-lay the paths only to have them dug up again. However if ABB are not planning any replacements, work on the pavements will start in May. As the Council intend to rebuild the footpaths completely this will mean digging out and replacing the hard-core base and the top surface. While they are carrying out the work they will also put in drop kerbs at each road junction. I will of course let you know if there are any changes to these plans.
